

WE ARE THE DISTRIBUTER OF HAFELE & BLUM

HAFELE Perfecting your home with Blum

Welcome to Blum in India

Blum is an international company that specializes in the production of functional furniture fittings. The company's main product groups are lift, hinge, box and pull-out systems for furniture - in particular for kitchen furniture

Working for Blum

Successful

Blum is a family-owned company and that is why the focus is on people. We believe our success is due to our employees' identification with the company, their readiness to perform and capacity to learn.

It's quite simple. We all work hard at Blum to be a good partner for our customers.

We encourage our employees to understand the importance of customers' wishes, innovative products and modern technology.

Häfele Launches Blum's TANDEMBOX antaro and TANDEMBOX intivo

HÄFELE Blum's TANDEMBOX antaro and TANDEMBOX intivo to meet the latest developments in the field of kitchen design and to complement its existing range of pull-outs. Austrian manufacturer of fittings with Häfele releases the new TANDEMBOX intivo and TANDEMBOX antaro in the Indian market to meet the latest trends in kitchen design and to complement the existing range. A multitude of design options and provides a wide selection of materials for high fronted pull-outs.

TANDEMBOX antaro is characterized by rectangular gallery rails. By using angular elements and by harmonizing the color of all fittings components, Blum has created a system that is a clear alternative to pull-outs with round gallery rails. TANDEMBOX antaro is based on tried and tested system components. The color and material concept of TANDEMBOX antaro is also based on that of TANDEMBOX intivo. This means that manufacturers have a manageable product range with many new and different opportunities for design

The individual TANDEMBOX intivo gives customers even more possibilities to personalize high fronted pull-outs. The box system is available in a vast array of materials and colors, thus providing a multitude of new possibilities for differentiation. TANDEMBOX intivo has a harmonious appearance, consisting of a drawer side without a gallery rail. The drawer side can be combined with a Boxcap, an attachment of the same drawer side material, or with design elements of any material such as glass (which can now also be printed with colorful décors, logos and writing), wood or stone, nylon or leather. When conceiving TANDEMBOX intivo, developers took great care to achieve a balance between drawer side and design element. The transition is smooth. There is no gap between drawer side and design element. The same concept can also be used for inner drawers. The new high fronted pull-out drawer side has 3-dimensional front adjustment – directly under the drawer side cover cap.

All pull-out systems provide enhanced user convenience. All of Blum's box systems close softly and silently with integrated Blumotion and all of them have a feather-light glide. Full extensions give users clear visibility and direct access to contents. Thanks to the wide range of products, a multitude of applications are possible. In addition, the box systems excel in terms of simple assembly and user-

friendly adjustment technology because all TANDEMBOX product lines have the same system components such as cabinet profiles and backs. The user convenience of Blum's pull-outs can be further enhanced with Servo-Drive. The electric opening system can be used for all three models. A single touch suffices and pull-outs seem to open by themselves. As an alternative, pull-outs can be equipped with the Tip-on mechanical system to increase opening ease.

An appealing selection of drawers and pull-outs TANDEMBOX PLUS

Whether a narrow drawer or wide pull-out, TANDEMBOX plus inspires by combining variety with universal application options.

The drawers can be enhanced with different side panels (BOXSIDE) as well as a single or double gallery.

Round gallery rails are the basis for the TANDEMBOX plus range.

❖ **For impressive organisation: ORGA-LINE, the inner dividing system**

BLUM TANDEMBOX

TANDEMBOX is Blum's premium metal drawer system. It is available in two different colors to match your cabinets perfectly, and it can even be customized by using a design element as the drawer side.

TANDEMBOX drawers open smoothly and close quietly thanks to their integrated soft close feature. Every TANDEMBOX drawer is full extension, meaning you'll have access to everything in the drawer, even the items in the back.

BLUM

Imagine perfect motion-that's what we do.

Furniture that open and closed effortlessly-every time, our commitment to perfecting motion for perfect furniture.

1.) Perfect freedom of motion(SERVO-DRIVE, BLUMOTION, TIP-ON)

Choose AVENTOS Life Systems for Smooth, Flowing motion. Even wide cabinet glide close again silently and effortlessly.

SERVO-DRIVE for TANDEM and TANDEMBOX

Drawers open automatically with just a light touch of the drawer front or a light pull of the handle. This amazing feature is based on an electrical drive that, when activated, opens the drawer for you.

SERVO-DRIVE can be used with TANDEM and TANDEMBOX drawer systems. Combined with the silent and effortless closing action of BLUMOTION, SERVO-DRIVE provides the highest quality of motion in the kitchen.

Product information

- Only one drive unit for all applications
- Can be used with all TANDEM and TANDEMBOX drawer lengths
- Can be used without drawer modifications

BLUMOTION

BLUM

BLUMOTION: Silent and effortless closing

BLUMOTION is the soft close system from Blum. Whether large or small, heavy or light, BLUMOTION soft closing action keeps doors and drawers from slamming closed. BLUMOTION is built into many of our products, and it can easily be added on to other items such as CLIP top and COMPACT hinges.

Product information

- Soft and silent closing
 - Adapts to various closing speeds
 - Overload safety feature protects the system from damage through use
 - Integrated into many of our products
-

TIP-ON

Doors and drawers that open with a simple touch

TIP-ON is an excellent solution for opening handle less doors and drawers. The mechanical opening feature allows you to simply push on the door or drawer front to open it. It's that easy.

TIP-ON for doors

Cabinet doors without handles open with just a light touch with TIP-ON for doors. TIP-ON for doors

was designed to work in face frame or panel cabinets and it also works in both overlay and inset applications.

It is easy to install and you can quickly adjust it so that your doors open perfectly every time.

TIP-ON for AVENTOS

Handleless cabinet doors open up and out of the way with just a simple touch, thanks to TIP-ON for AVENTOS. The mechanical opening feature allows you to open the door by pushing on the front, and closing is just as easy.

TIP-ON for AVENTOS provides a unique solution for upper cabinets in the kitchen, in the office, and throughout the home.

TIP-ON for TANDEM and TANDEMBOX

Drawers that open with just a light touch - it's possible with TIP-ON for TANDEM and TANDEMBOX.

TIP-ON is easy to install because you don't need any additional space in the cabinet. Adjusting TIP-ON is also simple because you don't have to remove the drawer to make the adjustments.

AVENTOS HF

AVENTOS HF: Bi-fold lift system

Opening and closing upper cabinet doors has never been so easy. With AVENTOS HF, doors fold up and out of the way. They can be stopped in any location, meaning the handle always stays within reach.

Product information:

AVENTOS HF is ideal for tall and medium size wall cabinets that range in size from:

- Cabinet heights from 19" - 42"
- Cabinet widths from 15" - 72"

AVENTOS HF applications

AVENTOS HS: Up and over lift system

AVENTOS HS lift systems open doors up and over the top of the cabinet. This means you can easily see everything inside cabinet. AVENTOS HS is ideal for large or heavy doors because they open effortlessly and close silently thanks to the BLUMOTION soft close action.

AVENTOS HS applications

❖ AVENTOS HL

AVENTOS HL: Lift up system

BLUM

AVENTOS HL lift systems open doors parallel to the cabinet. It works great in kitchens with high ceilings, and crown molding will not be a problem because of the motion of the door. AVENTOS HL is also an ideal solution for a counter top appliance garage.

AVENTOS HL applications

❖ AVENTOS HK-S

AVENTOS HK-S: Small stay lift

AVENTOS HK-S lift systems open doors just like AVENTOS HK. You can stop the door at any location and the doors still close silently. The difference between AVENTOS HK and HK-S is that it has been specifically designed for smaller cabinets. This makes it ideal for smaller cabinets above refrigerators and pantries.

AVENTOS HK-S applications

❖ STANDARD

BLUM

STANDARD: The proven runner for wooden drawers

STANDARD runners are designed to be used in a variety of applications. These conventional drawer runners are functional, durable and offer exceptional running action.

STANDARD applications

Lift system

BLUM

Häfele has established itself as a pioneer in introducing futuristic technologies and systems that ensure convenience, ergonomics and easy accessibility. Häfele's range of lift systems primarily consists of Blum AVENTOS Lift Systems (with the option of installing handle-less lids) and Duo / Duo forte Flap Fittings.

Blum AVENTOS Lift Systems – The trend of using handles to operate the traditional overhead cabinets with doors is now internationally a passé. Handle-less furniture has now become an established element of modern furniture design. Häfele brings to you a range of Blum AVENTOS lift systems that allow you the possibility of installing lids with or without handles. These lift systems open upwards away from your line of work thereby providing hinder-free movement within the kitchen along with excellent access to the cabinet interiors. The AVENTOS lift systems can be installed together with SERVO-DRIVE (the electrical motion support system) or TIP-ON (the mechanical opening support system) to achieve that much-desired handle-less application.

Duo/ Duo forte Lid Stays and Gas Springs – Besides the Blum AVENTOS Handle-less Stay Lifts, Häfele also offers you a range of manual lift up systems consisting of the Duo/Duo forte and the gas springs. These lift up systems are suitable for both left and right hand use and can be mounted on wooden door flaps and for door flaps with aluminium frame.

Corner Units

BLUM

The most underestimated space in the kitchen is the corners. More often than not, we tend to waste the space available under the joints of the kitchen counter top assuming that not much can be done with it. As a matter of fact, corner spaces when utilized optimally can prove to be the most effective space allocations for storing pots and pans and other daily utility items.

Hafele presents to you a holistic range of corner solutions that can fill up both blind as well as L-shaped corners effectively. Our range includes the following options to choose from

Options for L-shaped Corners:

- Space Corner units with SYNCHROMOTION by BLUM
- Recorner Maxx (3/4)

Options for Blind Corners:

- Magnia Powerslide
- Proarc Powerslide
- Wari Corner
- Twin Corner

Overview Blum Cabinet Fittings

CLIP top BLUMOTION - Hinge System

BLUM

CLIP top BLUMOTION is setting new benchmarks. Elegant design combined with high - quality technology.

Häfele's range of Kitchen fittings offers you the flexibility of creating overhead cabinets with hinged doors that open sideways – the objective is to provide utmost convenience and ease-of-use within the individual requirements of the customer.

Our range of Kitchen hinges for cabinet fronts offers a magnitude of possibilities with varying opening angles that cater to every possible application. This range also includes special hinges that can be used for aluminum profiled doors or glass doors giving you the flexibility to design your cabinets with your individual style. For applications that require added convenience and true ergonomics, our range of soft-closing damper hinges provide for an ideal solution. Häfele's range of furniture hinges also offers you an exquisite range of BLUM hinges giving your cabinets the possibility of acquiring leading technologies like BLUMOTION (for smooth and silent self-closing doors) and TIP-ON (for handle-less cabinets that open-up at the slightest push from the hand).

With its origin from a region that nurses the passion for hardware technology, it is no surprise that Häfele has lived up to its roots through a successful presence in the architectural and furniture hardware industry for 85 years now. The Häfele product range now also includes unique customer services. Häfele supplies the industry with globally successful hardware systems from its own development and production. In special cases, Häfele works in collaboration with industrial customers on the development of individual hardware solutions that are manufactured by Häfele or for Häfele.

Blum turns the opening and closing of furniture into an experience that significantly increases the comfort of motion in all areas of the house, but especially the kitchen. Over 5000 employees are working worldwide realising our goal to create perfect motion for Blum fittings systems. Within this process, we always focus on the needs of the kitchen and furniture user.

Blum fittings systems shout "high quality" with their well-thought-out function, recognised design and high durability. They are designed to spark inspiration and create an emotional experience out of day-to-day kitchen tasks.

Häfele is the global leader in internal drawer and cupboard technologies. Like Kitchen Craftsmen, Häfele is passionate about providing super intelligent design and product that deliver incomparable kitchen comforts and convenience through optimum functionality. Häfele famously pioneers ideas for kitchen areas and innovative storage space management.

Blum

Functionality is so important and quite simply, we choose to recommend Blum because it turns the opening and closing of furniture into an experience that significantly increases the comfort of motion in the kitchen. Additionally, because Kitchen Craftsmen designs for the end-user - you - all fittings systems must shout "high quality" with their well thought-out function, faultless design and high durability. Blum products are designed to spark inspiration and create an emotional experience out of day-to-day kitchen tasks. Along with Blum, one of the world's most trusted and innovative brands, we offer you a comprehensive range of elite products.

Häfele and Blum : Ten years of successful cooperation in India.

“ Blum and Häfele are both family-owned companies sharing similar values and visions. Service and quality are the main drives in our joint effort of perfecting motion. We expect a major upgrade of the Indian furniture market in the years to come, which will increase demand for high-quality solutions.”
